PALOS FARMERS USE OIL BARRIER IN CINCH BUG ERADICATING FIGHT

The Palos farmers are being troubled with cinch bugs. Several are trying the oil barrier as a preventative which is quite successful.

WOLUNGUM CLUB OF PALOS TO STAGE PLAY

The Wolungum Club are planning on giving a three act farce at the Palos Improvement club house Saturday evening, July 28. The play has been written and is being directed by Mrs. Morris Wells. The cast includes some of the club's foremost and prominent members. The setting of the farce is in the year 1943 and many unexpected things take place. Although it is not a mystery play such as the present "Cat and the Canary" which had a long run in Chicago, yet it has a name which well we can't tell you any more. Come and see it presented July 28.

WHAT HAS BECOME OF NEW TINLEY SCHOOL?

What has become of the new Tinley Park school project? In the spring a deep interest was displayed for a new school, but since the last election for choosing a new site was held, interest has apparently died out. The affair is as dead as the proverbial door nail. The question is raised, what is the school board going to do? The people voted in favor of a new school and in favor of a bond issue for a new building. Now the question arises whether the will of the people will be fulfilled or not. There is no denying the fact that Tinley Park needs a new school house and needs it badly. With the growth of Tinley Park, a new school house must eventually come, why not now? The school board has been at logger heads among themselves. Bills which were filled since last spring have not been paid yet as the new school board refused to honor the vouchers which were signed by the old board. So far no move has been made to pay these claims and it is time that the school board took some kind of action in the matter. It is an injustice to the community to let things drag along as they are doing. By standing still we go backward in our affairs, for we only progress when we are active. It is to be hoped that the school board will be doing something before long.

PALOS ATHLETIC TEAM DEFEATS MARRIED MEN

The Palos Athletic Team were victors of a game played Sunday with the married men of Palos. The game was thrilling and interesting especially when Mr. S. Traub made a home run on a fowl hit. To bad Mr. Traub had the unnecessary run

FRANKFORT CHURCH WILL DEDICATE NEW \$5,000.00 PIPE ORGAN THIS SUNDAY

One of the greatest gala days that the Frankfort St. Peter's Evangelical church has had since the day of the dedication of the new edifice, is scheduled to take place this coming Sunday when the fine new Este pipe organ will be dedicated. Music is one of the most beautiful parts of a service and special music will feature the elaborate special services to be held in the morning, afternoon and evening.

Neighboring Evangelical congregations have been invited and a very large attendance is looked for.

The new pipe organ is one of the finest in Will County outside of Joliet. It was purchased at a cost of \$5,000 including installation. The organ is operated by a motor and is of the very latest design.

In order to care for the physical wants of many out of town guests, a dinner will be served in the church basement and also supper.

Rev. G. Lambrecht, pastor of this church and his congregation are to be congratulated on having such a beautiful organ and for showing a fine spirit of progress since the new edifice was dedicated in 1916.

FRANKFORT TEAM TO PLAY ALL STAR TEAM

The Frankfort base ball team is going to play a real team this Sunday when they play the "All Star Team" made up of expert players from Chicago, Chicago Heights and Hammond, Ind. All you fans come out and see a real game.

MOKENA BOARD ISSUES A FEW "DON'TS"

The Main street of Mokena which has been closed for seven weeks has been opened to traffic since the street has been given a top dressing of crushed limestone. Karl E. Krapp, village clerk announces that the village board wants all autoists to observe the following don'ts which if violated will mean that the violators will be subject to a fine: Don't speed. Don't start your car with a lurch and when stopping do not slam on your brakes so the wheels will slide for by so doing you will be tearing up the crushed limestone coating. Don't turn your car around in the middle of the block, but turn around at the corners.

FOR SALE 20 Pure Bred Hampshire Brood Sows.

C. E. DAVIS, Tinley Park, Ill. Telephone 56.

around the bases. Henry Laasch was injured during the game but not seriously. Mr. G. Hermanson also suffered several falls. The married men will need more practice to defeat our crack young fellows.

Science Sees Birth of World Repeated in Etna Eruption

MT. ETNA AND SICILIAN VILLAGE NOW WIPED OUT

THE eruption of Mt. Etna, spreading terror and disaster along the whole eastern coast of Sicily, offers to scientists a rare opportunity to study elemental geological forces in Nature's own laboratory.

With its circumference of ninety miles, and its altitude of 10,800 feet, reaching up from the 1,000 fathom floor of the Mediterranean itself, Etna is the largest active volcano in Europe. In its recent upheaval of fire and molten lava, geologists declare that Etna is repeating, on a small scale, the phenomena that took place when the world itself was born.

It was in the midst of just such volcanic fires, according to researches advanced under the direction of T. F. Manville, president of Johns-Manville Inc. that the world got its present store of asbestos, most of which is to be found in Canada. This substance, it was learned, is older than any other material known, either in the vegetable or mineral kingdoms. It is thought by most scientists to have been

PIECE OF CRUDE ASBESTOS—THE STRANGE PRODUCT OF VOLCANIC FIRE

formed in its present fibrous state under the terrific pressures which were set up when this planet began to cool off.

Having been created in the heat of the greatest fires in the history of the world, asbestos is immune to any ordinary temperatures, and shows no change at all in temperatures up to 1500 degrees Fahrenheit. That is why it is used so widely in places where the fire hazard is great or where it will be exposed to high temperatures as in packings, roofings, insulations and brake linings.

In the cooling process, asbestos developed fibres that look like spun glass. It is the only mineral in the world with a fibrous structure, and thus the only material from which it is possible to make both a fabric and a dense solid.

The recorded eruptions of Etna date back to 476 B. C.

ORLAND BOY RIDE BACK OF AUTO; HAS CLOSE CALL FROM INJURY

Master Floyd Cooper, three year old son of Mr. and Mrs. Raymond Cooper had a very narrow escape of being seriously injured Sunday evening about 8 o'clock. While riding his bicycle he rode in back of Mr. Tom Stein's car which had stopped just past the corner of Beacon and Oak streets. He not seeing the bicycle as it was dusk, thought no one was in the way and began to back his car when he suddenly heard a scream. Mr. Stein being an experienced driver soon brought his car under control and stopped. The bicycle was smashed up badly but Floyd had fallen off the opposite way and so escaped without a scratch.

Mrs. Lester Kay entertained a number of her lady friends Saturday afternoon in honor of her birthday. The time was spent in playing luncheon prizes being awarded to the winners. After the game a fine luncheon was served by the hostess.

Mr. Christ Yunker is unable to attend his duties at Western on account of illness.

Miss Adelle Schmadeke and Mr. John Humphrey attended a matinee in Chicago Thursday.

Miss Luella Schrader is enjoying a vacation at the W.R. Schuessler home.

Mr. and Mrs. Charles Koehler and family spent the week end at Buckley Illinois with the latter's parents Rev. and Mrs. Schultz.

Mr. and Mrs. Ralph Hauss returned home after spending a few weeks at the latter's home in Wisconsin.

Mrs. William Cox is enjoying a vacation with her sister in Grand Rapids, Michigan.

George M. Yunker is the proud possessor of a new Ford.

Mrs. John Kott of Vicksburg, Michigan returned to her home Saturday after spending two weeks at the home of her sister, Mrs. Elizabeth Wagner.

Mr. and Mrs. Herman Uthe and sons spent the week end with the former's parents, Mr. and Mrs. Henry Uthe.

Mrs. Lawrence Uthe and son Donald visited relatives in Chicago.

Mr. John F. Schmadeke our local

ARREST SPEEDER AT TINLEY PARK

The new concrete road is getting to be regular speedway and the motor cycle cops are being kept busy keeping on the trail of the speeders. One night last week a speeder was nabbed in Tinley Park by the motor cycle squad. Many of the autoists race thru here at 30 miles an hour instead of 15 miles an hour as required by law.

FRANKFORT BALL CLUB TO GIVE HOP AT MOKENA

Manager Frank Schau of the Frankfort base ball team announces that the club now has a membership of 50 members. The club is planning to rent the Mokena Men's club pavilion for the purpose of holding a dance in the near future for the benefit of the club. Date will be announced later.

MISS KRAMER NAMED AS DEAN OF N. C. SCHOOL

Miss Helen Kramer, niece of Mrs. Herman Stoekman of Tinley Park, who came here from Germany about a year ago, has just been appointed dean of the musical department of the Marshall Hill school in North Carolina, a fashionable boarding school for young women. She is an accomplished musician. She has played for broadcasting stations and also has had much experience in musical work in Chicago.

store keeper, purchased a Dodge truck and is now delivering his orders in an up to date way.

Mr. and Mrs. Fred Uthe and daughter Ruby, Marie and Mildred spent the week end at the Clarence Bump home near Lockport.

Mr. and Mrs. Clarence Beagley Mr. John A. Klien and Miss Esther Gee went fishing at Cedar Lake Wednesday evening July 18.

Mr. and Mrs. Ray Doctor are the proud parents of a baby girl.

Mrs. Thomas Wheeler left Saturday morning for St. Louis where she will visit at the home of her sister-in-law, Mrs. Alfred Goodall.

MOKENA BENEFIT PICNIC DRAWS GREAT CROWD

The benefit picnic given by the Mokena Volunteer Fire Department for Fred Mau, former fire Marshall, last Sunday at the Mokena Men's Club pavilion, drew a record breaking attendance. The dances both in the afternoon and evening were exceptionally well attended. The total receipts came to \$875 leaving \$500 clear profit which amount was turned over to Mr. Mau. He has been in poor health for sometime and has just returned from the Blue Island hospital.

The Sunflower Colored Quartette made a hit. It is said this was one of the largest crowds seen on the Mokena Men's Club dance floor in many years. People attended from miles around.

TINLEY PARK FARMERS REPORT CINCH BUGS

Farmers in this section are facing a new pest. Cinch bugs which infected the wheat crop in this locality years ago, have made their appearance in the oat fields this year and have been quite destructive. The pest was first noticed in large numbers in this section on the Carl Schults farm. Perhaps the farm bureaus will find some effective remedy for killing off the bugs.

PRESBYTERIAN CHURCH ACTIVE AT PALOS PARK

The Presbyterian church had a very effective service Sunday July 22. Ten members were received into the church. They were; Mr. and Mrs. Geo. Hermanson, Mrs. B. Hyink, Mrs. S. Frank, Mr. W. Mahaffay, Antionette Bruzek, Marjorie Frank, the Misses Emma and Cora Hyink, and Harry Polz. Special music was rendered by Mrs. F. Powell and Mrs. F. Yunker. Mr. Wilson Chaplain of the Presbyterian hospital of Chicago officiated at the services, assisting Rev. Mr. Moore.

MISCREANT TAMPERS WITH MOKENA FARMER'S MAIL BOX IS REPORT

Some mischievous persons have been playing pranks on F. M. Story of Mokena by filling his mail box full of mud. The last straw came Monday when the miscreant tied the mail box shut with a piece of wire. The guilty party evidently does not realize he is flirting with Uncle Sam and if he is found out it won't be quite so funny.

A Romance of the South

John Solomon Incognito

BY H. Bedford-Jones

Begins in New Orleans and threads the bayous, lakes, marshes and water lanes that lead to the Gulf of Mexico. The character of pure Creoles and mixed races of the section is brought out most charmingly.

One gets intimate view of city, plantation and life upon the sea. Men fight for a girl who is well worth the battle. There is a Chinese mandarin, as mysterious and baffling as any of his race ever encountered, and an element of villainy that is picturesque in the highest degree.

But best of all is John Solomon, of the merry nature and matchless brain, who sets himself to brave the terrors and defeat the aims of the conspirators. He enters in a very unobtrusive manner, but grows in interest as the tale unfolds, until you are forced to admit that you never met his equal in a story.

A New Serial Starting in

THE NEWS-BULLETIN

Commencing with this issue.

MOKENA NEEDS \$2900 TO PAY STREET WORK; TO BOND VILLAGE AGAIN

Improving the streets of Mokena has taken much money and the village board finding the funds available inadequate to cover all the expenses, has decided to float a \$2900 bond issue for this purpose. At a special meeting of the council held Monday night an ordinance was passed providing for the issuance of \$2900 in bonds to pay for the resurfacing of the village streets. Before any bonds can be issued this ordinance must be first approved by the voters of Mokena at a special election called for August 25th. If this issue is voted down, then the money needed would be raised by special assessment.

Thus far the improvement project has cost \$3400 and another \$3000 will be required for applying the Hard Tread composition. The village has \$2600 in taxes coming in soon so that with this amount and the proposed \$2900 issue there would be enough money to pay for the entire work.

On the other hand there is an indebtedness of \$5600 on former bond issues still to be paid and if the proposed bond issue carries and the \$2900 additional are added to the old indebtedness the total indebtedness of the village will be \$8500.

The ordinance authorizing the new bond issue provides that the first one of the bonds to be paid will be for \$400 payable on September 1, 1925 and a \$500 bond for each of the following years: 1926, 1927, 1928, 1929 and 1930. In another part of this paper will be found the ordinance just passed in its entirety.

JOHN RAUCH BUYS FIRCHAU BLACKSMITH SHOP AT TINLEY PARK

John Rauch has purchased the blacksmith equipment of the late August Firchau and will move his present shop to a few days.

CARD OF THANKS

We wish to express our heartfelt thanks to our neighbors and friends for their sympathy and kindness shown us during the illness and death of our beloved husband and father. We also wish to thank Rev. A. Buddenhagen for his comforting words.

MRS. AUG. FIRCHAU AND FAMILY.

The Luther League held a very enjoyable gathering at the home of George Hartwig last Thursday night. About fifty guests were present. The evening was spent in playing a new game, lawn bunco. A fine luncheon was served.

"Patsy" Koehler has a wonderful dog. Hesays the canine is the best rat catching dog in Cook County. His name is Patsy O'Brein and that he has already refused a \$45 offer for him.

Tinley Park has a mystery. A parrot is the principal figure in it. Tuesday a gorgeously colored bird appeared at the Jacob Funk place, but eluded capture. It is supposed the bird of royal plumage must have escaped from some home in this vicinity.

A number of Tinley Park people who are interested in the German Sang Verein of Chicago are planning to attend a big gathering of the Verein at Hammond on Sunday.

Ben Ricks and family have moved to Nebraska. Mr. Ricks was in the employ of the Rock Island for many years.

A company of young folks held a wiene roast in the woods Tuesday evening in honor of Chester Ricks, who has moved to Nebraska. The usual good time was reported.

Rev. and Mrs. Zeuner and family of the German M. E. church are attending the German M. E. camp meeting at Berger, Ill., this week. The camp meeting opened Tuesday.

Tinley Park is having a paint up and remodeling campaign. The German M. E. parsonage has been painted and the M. E. church also.

E. Freberg is remodeling his residence.

Work has been started on laying large drainage tile along 94th St., near the Wm. Hollstein farm.

The Blue Island Athletic Club is going to hold a dance at the Linden Garden this Saturday night.

Safety for your Harvest Money

When the days of toil are over and you've reaped the financial reward for your efforts, there come many temptations to spend that Harvest Money. The safest and best procedure is—Put it in a Savings Account with this strong and dependable Bank. We pay 3 per cent interest on savings and 4 per cent on certificates of deposit.

Something to Think About

By F. A. WALKER

IMPRESSIONS

THE introduction of a fresh object into a room, a new picture, a vase or a piece of furniture will frequently arouse a dormant mind and stir it to mental wakefulness.

The old, familiar things are quite forgotten in the presence of the late comer with its novel shape or color. If it happens to be comely, so much the better, for it exerts a more potential power in stirring new thoughts.

We all know the effect a bouquet produces in a dingy room unfamiliar with bright tints and sweet odors. The inmates of the house will pause frequently in their work to admire the flowers and poke their noses among them to inhale the fragrance. An invalid will experience a new interest in life in the presence of a freshly cut bunch of roses. Melancholy thoughts vanish and the mind goes afield picturing green swards where the sun is shining and the birds are singing.

Instead of the doleful tick of the clock, he hears the gurgling brooks, the tinkling bells of the herds in pastures and the rustling of quivering leaves.

Under the changed impression, the invalid's whole mentality is transformed. Hope lives anew. He has at last found the "lost chord" and proceeds to take up the refrain and carry it through to the end.

In mental life, especially, change of impression is necessary.

Those who think most, whose minds are constantly employed, whether they know it or not, need more changes.

All change or transition of the thinking faculties from one state to another acts as a stimulus. The more pronounced the change, the greater the awakening effect.

Painters lost for color harmonies,

Uncommon Sense

By JOHN BLAKE

LITTLE DIFFERENCE

IN THIS world there are more than a billion and a half people, most of them 80 per cent or more like you.

They have eyes and ears and arms and legs. They need the same kind of food, and take the same kind of method to get it.

They love and hate, and fight and quarrel, and laugh and cry.

They marry and have children. They see the same sky and the same sun and the same moon and stars. They are subject to heat and cold and pain and sorrow.

What chance have you got to rise above that deadly average?

A very excellent chance, indeed.

For 20 per cent of you is unlike that of the rest of humanity, and that 20 per cent is in your brain.

The head of Darwin and the head of the man who made his shoes were not so greatly different—outside.

But they were tremendously different—inside.

It is the difference between you and the rest of the world that will lift you above the average—if you are to be lifted at all.

If the difference is in your favor, it will count. And it need not be a great difference.

If you work while the average man loaf, you will surpass him. If you think while his brain is idle, you will surpass him very rapidly.

The disposition of most people to

pack their bags, lie to the hills and work out of doors. They return to their studios with new impressions and energy.

Monotony dulls the brightest wits; frequent change sharpens them.

An unvarying sound lulls us finally to slumber, but if the noise suddenly ceases or changes in character, we awake and wonder what has happened. To do our best work we should often run away from it.

Consider not the time lost, but count it as well invested, compounding interest and making us more capable of larger and loftier achievement.

(© 1923, by McClure Newspaper Syndicate.)

Galloping Time.

An old colored woman had stopped on the street corner to chat with another member of her race. Suddenly, as the town clock struck five, she started and exclaimed: "Mah goodness, tempus stultum am fugitum! Guess Ah'd bettah go on home count dem chillern."

SCHOOL DAYS

loaf, to idle, to cultivate bad habits, is in your favor.

If you do none of these things you cannot help stand out as an unusual man or woman.

If in addition you consciously try to do better in all things than the average, you will succeed in doing so.

Remember that out of that billion and a half there are only a few who will be your active opponents. Those few will give you real competition, but competition is the food that success is made of.

Be better than the average. Similar as you are to most men on the outside of your head, try to be different inside of your head.

It will not be easy, but it will be worth doing.

Man a Natural Imitator.

For imitation is natural to man from his infancy. Man differs from other animals particularly in this, that he is imitative, and acquires his rudiments of knowledge in this way; besides, the delight in it is universal.—Aristotle.

THE LONELY

By GRACE E. HALL

THERE are so many lonely! Perhaps you do not know, Or maybe you have never thought, as on your way you go;

Not all are gifted with the charm that wins your nod and smile, Thought you might find a noble mind —if you but paused a while.

Some grow by cultivation, but give no hint or glow, Unless consideration some kindly friend shall show;

Then, like the leaves of some new book, fresh pages they unfold, And in surprise you analyze and find them purest gold.

There are so many lonely! You surely know a few

Whose lives might broaden greatly through kindness shown by you; It need not cost in dollars—not much in any line,

Mere cordial tone can hush a moan, like soothing anodyne.

(© by Dodd, Mead & Company.)

RECALL OF WOOD UP TO HARDING

Both Houses of Philippine Legislature Adopt Resolution Unanimously.

ASK IMMEDIATE DISMISSAL

Split Between the Governor General and Manuel Quezon Also Develops Into a Local Political Partisan Embroglio.

Manila, July 24.—Immediate recall of Governor General Leonard Wood was demanded in a resolution unanimously adopted at a joint meeting of both houses of the legislature here. The resolution was addressed to President Harding.

All of the parties participated in the action endorsing the stand taken by the cabinet when its members resigned recently.

Governor Wood is in the province of Samar making an inspection of health conditions there.

The split between General Wood and Manuel Quezon, which resulted in the resignation of all leading officials of the Philippine government, has developed into a local political partisan embroglio, with the Democratic party supporting Governor Wood and the Collectivists party opposing him, according to political leaders here.

The Democrats leaders adopted resolutions opposing the joining of the parliamentary mission, which is to leave for Washington within the next two weeks to lay the facts of the Filipino controversy before President Harding. Instead the Democrats leaders favored a plan whereby the regularly elected resident commissioners would be given full power to lay the full facts before President Harding.

Governor Wood stated that no offer of cabinet positions had been made to members of the Democratic party, and, so far, no Collectivists members have been willing to accept such positions.

In the meantime, he said, the undersecretaries are carrying forward the business of the Philippine government.

Hands of Babies Rip Immigration Law to Pieces

New York, July 24.—"Babies born at sea on vessels flying foreign flags will be admitted to the United States despite and dismal old law," Immigration Commission Curran said.

Sofia Przygon, of Polish stock, was born to Mrs. Sofia Przygon on July 13 on the Lapland, a British vessel. Irene Troyanowski, also Polish, first saw the light of day on the Belgian land.

"I looked at those two babies," Mr. Curran said, "and when they gripped my fingers I didn't need any special court of inquiry. Whenever babies just happen to make themselves known a few days before they see the statue of Liberty, why, they come in."

British Spurn Disarm Parley; Commons Defeats Labor Plea

London, July 24.—Labor's attempt to swing the house of commons toward a policy calling for an international disarmament conference broke down after Prime Minister Baldwin clearly stated the government's opposition to the plan. Mr. Baldwin said the fighting instinct of human nature was one of the greatest stumbling blocks in the way of calling an international conference.

"It is the tiger's instinct," he declared. "From creation it has been found in democracies and empires, and even among men whose political views might be classed as pacifist."

Father Gives Up Son as Brother's Slayer

Russellville, Ark., July 24.—Accused of stabbing his brother to death, Jess Church, eighteen, son of Marcon Church, farmer, of the Hector community, was placed in jail here. The youth quarreled with his brother, Preacher, sixteen, over a horse after a party, according to information to officers, and the fight ensued, resulting in the younger brother's death. The youth was surrendered by his father.

Wheat Hoarding Held Unwise by Government Officials

Washington, July 24.—While appreciating the plight of the wheat growers, officials of the farm loan board, the federal reserve board, the war finance corporation and the Department of Agriculture appear a unit in regarding the suggestion of the American Farm Bureau federation for holding 200,000,000 bushels of wheat on the farms as unsound.

Dock Strikers March From London.

London, July 24.—After a night march from London, 1,000 striking dock workers reached Tilbury and persuaded several hundred men there to join them. Work was halted on six big liners.

Naval Transport in Haiti.

Port au Prince, Haiti, July 24.—The naval transport Chaumont arrived here, carrying a party of congressmen, including some members of the house naval committee. The party is making an inspection of naval bases.

MELLON NOT TALKATIVE MAN

Secretary of the Treasury Will Never Make Reputation as a Great Conversationalist.

Two Scotsmen, noted for their rarity of speech, were playing golf. Up to the seventeenth hole neither spoke a word.

It began to rain and Sandy observed: "Shall we quit?"

"Chatterbox," muttered his opponent, as he drove off the final.

Secretary Mellon is silent like that, writes "Girard" in the Philadelphia Enquirer. If, as our copybooks informed us, silence is golden, that able banker came by his great wealth in the most natural way.

"This is not a talkative cabinet"—that from a Philadelphia coal man often brought into contact with Mr. Hoover and others of the presidential family.

"But," he continued, "Secretary Mellon can say less in a day than all the rest of them put together."

A dog appears to always agree with his master except when he is being led by a chain.

A farmer boy is naturally curious to find out if he has talent for something besides farming.

MATTER HE DIDN'T MENTION

Boastful Man Got Away With Box of Chocolates, but There Was a Reason.

A man was boasting to some others he had met that he could take any article from a shop without being detected. One of his hearers bet him that he could not take a box of chocolates in this way.

The man agreed and they went along to a grocer's shop.

"You wait here," said the daring one, "and you'll see!"

With these words he went into the shop, took a box of chocolates from the counter and walked out.

"There you are!" he said proudly. "I've won the wager!"

The stranger smiled. "You're very smart!" he answered. "But I happen to be a detective and I am going to arrest you for stealing!"

"Wait a bit, sir," said the other coolly. "I happen to be the proprietor of the shop!"

So Far, So Good.

"Will you marry me?" "I like your nerve!" "How about my other qualifications?"

Give a woman authority over a man and she will impose on him.

The Meat of the Wheat

STARCH is the "meat" of the wheat berry. It is the great energy-producing element of the grain. But, in order to do you any good, it must be thoroughly digested, and it is right here that such a food as Grape-Nuts renders special service.

Grape-Nuts, made from wheat and malted barley, supplies the meat of the wheat in most digestible form.

That is because in the making of Grape-Nuts a large proportion of the starch is converted into dextrins and maltose—forms into which all starch elements must be changed before they can be assimilated by the system.

Grape-Nuts not only digests easily, but also aids in the digestion of other foods.

Crisp, delicious Grape-Nuts with milk or cream is a complete food. It supplies the life-essential vitamin-B; also iron, phosphorus and other important mineral elements for nerve, tooth, bone and other body structure.

The daily use of Grape-Nuts is a form of health insurance which has demonstrated its value for more than 25 years.

Grape-Nuts
FOR HEALTH
"There's a Reason"

Your grocer has interesting details of our offer of over \$7500.00 for Grape-Nuts Recipes. Ask him about it, or write to Recipe Dept., Postum Cereal Co., Inc., Battle Creek, Mich.

Mother's Cook Book

It is not our failures that ruin us; but our fear and tardiness in making new beginnings after failure.

It isn't the fact that you're down that counts; it's how do you take it.

MIDSUMMER DISHES

THIS is the season when garden parties, porch parties and dinners at the country clubs flourish. It depends upon the ideas of the hostess whether the function be a breakfast, luncheon, tea, dinner, supper or just light refreshments.

A cake to serve with ices that is delightful to the eye as well as the palate is prepared from a rich white cake batter, baked in small oblongs or cut into such shape, frosted with white frosting and decorated with stems of angelica cut into narrow strips, five to six on each cake, topping the stem with different colored cordial drops which may be purchased in any confectionery store. The effect is like a small flower garden and thus the cakes are named Flower Garden cakes.

Four Fruit Sherbet.

Measure one pint each of sweet cherries, red currants, strawberries and raspberries. Crush the fruit with a wooden potato masher, add a pint of water and set over the fire until the water is nearly boiling, strain the juice, press the pulp as dry as pos-

sible to extract all the liquid. Add to the juice a pint of sugar, the juice of a lemon and two oranges, the grated rind of a whole orange and half of a lemon. Freeze until firm. Serve in cone-shaped helpings with a soft custard poured around each cone.

Fricassee of Carrots.

Steam three or four large carrots. Grate two medium-sized onions and brown in a pan with one-half cupful of butter, stirring them until they are of an even deep brown color. Cut the carrots into slices one-fourth inch in thickness. Add the carrots to the pan and cook until lightly browned. Dredge the whole with two tablespoonfuls of flour, one teaspoonful of salt, a few dashes of pepper and a cupful of rich stock; let the whole come to a boil and serve garnished with minced parsley.

Can Rise Above Circumstances. "He who wills can do," said the ancient philosopher. Life itself is largely exercise of will power, rather than the result of circumstance. To plead the latter is virtually to confess weakness of mind and heart.

Has Anyone Laughed At You Because—

By ETHEL R. PEYSE

You are afraid to try diving? Maybe their laughter will laugh you into it and, therefore, it may do you some good. Yet diving to the land-lubber certainly does look "dreadful".

It takes a lot of good courage, polished up to glistering point, to throw yourself on your head into water! You are losing a good time by not making this "head-way", but maybe if the laughers keep it up you will dive out of pique!

SO

Your get-away here is: To puzzle out your reasons for fright, kill them, and dive in!

(© by McClure Newspaper Syndicate.)

Again the Malady of Youth. Our recent note on James Russell Lowell's confession of "incurable childhood" has led a correspondent to send us the following quotation from the letters of Franklin K. Lane: "Although an 'aged man,' as I was once described in my hearing, I am the youngest thing inside that I know, in my curiosity and my truthfulness and my imagination and my desire to help and my belief in goodness and justice."—Boston Transcript.

Poise Plus.

A North De Quincy street youngster listened the other day in silence to a long, severe scolding. Then she said: "Now, mother, you're all nervous again."—Indianapolis News.

FRIENDS NOTICED IMPROVEMENT

Wonderful Results from Lydia E. Pinkham's Vegetable Compound

Beloit, Wis.—"My female trouble was brought on by overwork. I had worked in stores and had to do heavier work than my strength could stand, and had to be on my feet most of the time. Finally I had to give up this work entirely and stay at home. Doctor's medicine did not give me much relief, and my mother wanted me to take Lydia E. Pinkham's

Vegetable Compound. I took a couple of bottles of it and thought it did not help me as much as it should, so I gave it up to try something else. Nothing I took helped me much, so I finally decided to give the Vegetable Compound another trial and to take enough of it to make sure it would help me. I have taken it over a year now and it has brought wonderful results. I have gained from 93 to 110 pounds and am keeping house now. My friends all notice the change in my health. I will be glad to answer all letters that women write to me about the Vegetable Compound."—Mrs. W. G. MONSON, 1515 Park Ave., Beloit, Wis. Mrs. Monson is willing to write to any woman suffering from such troubles.

Piles

are usually due to straining when constipated.

Nujol being a lubricant keeps the food waste soft and therefore prevents straining. Doctors prescribe Nujol because it not only soothes the suffering of piles but relieves the irritation, brings comfort and helps to remove them.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol
A LUBRICANT—NOT A LAXATIVE

New Wave-Changer Switch.

A three-point wave-changer switch with locking attachment is now available for radio generators. The switch arm is so arranged that when it is moved across the face of the appliance it may be locked in either of three spring contacts. Each of these contacts gives the necessary connection for a different length of radio wave. By this method of securely fastening the arm in position on the contacts, there is no possibility of the arm jarring or vibrating out of place.

Where Is the Constitution?

In Philadelphia baseball fans were fined for attacking an umpire. And in the cradle of liberty!—James J. Montague.

A favorite among children is one of them who comes with a new kind of noise-maker.

Safe instant relief from CORNS

One minute—and the pain of that corn ends! That's what Dr. Scholl's Zino-pads do—safely. They remove the cause—friction—pressure, and heal the irritation. Thus you avoid infection from cutting your corns or using corrosive acids. They are: antiseptic; waterproof. Sizes for corns, callouses, bunions. Get a box today at your druggist's or shoe dealer's.

Dr. Scholl's Zino-pads

Made in the Laboratories of The Scholl Mfg. Co., makers of Dr. Scholl's Foot Comfort Appliances, Arch Supports, etc.

Put one on—the pain is gone!

LESSON FOR JULY 29

MATTHEW, THE PUBLICAN

LESSON TEXT—Matthew 9:9-13; Luke 5:27-32.

GOLDEN TEXT—"I came not to call the righteous but sinners to repentance."—Matthew 9:13.

REFERENCE MATERIAL—Mark 2:13-22.

PRIMARY TOPIC—Matthew Invites Jesus to His Home.

JUNIOR TOPIC—What Jesus Did for Matthew.

INTERMEDIATE AND SENIOR TOPIC—Matthew Overcomes a Handicap.

YOUNG PEOPLE AND ADULT TOPIC—Matthew, a Study of Conversion.

I. Who Matthew Was.

Of Matthew little is known, even his birth place is concealed. Our first sight of him is seated at the toll booth collecting taxes. The tax gatherer was hated by the loyal Jews because he collected taxes for the alien government under whose yoke they were galling. This hate was the more bitter because of the extortion usually practiced by those in rule. From the meager accounts we find that Matthew was:

1. A Man of Decision. We do not know whether he had ever seen or heard of Jesus before this time, but we note that he at once arose and followed Jesus. Without doubt, there were many things to concern him. It was no little task to break off from his business which apparently was very lucrative.

2. He Was a Humble Man. In chapter 10, verse 3, the order in which he gives his own name and the fact that he designates himself a "publican" would show that he did not overestimate himself.

3. He Possessed Force of Character. This is shown in the fact that he gave a feast and invited his friends in to see and hear his Lord.

He had two names, Levi, which means "attached" or "joined," and Matthew, which means "gift of Jehovah." Most likely Matthew was the name assumed after his conversion.

II. Matthew's Call or Conversion (Math. 9:9).

1. As Jesus Passed By, He "Saw a Man." He saw the possibilities which were in Matthew. He saw through the hated profession of a tax gatherer the shining possibilities of his manhood and apostleship. He saw in him the man fit to perceive and portray the Messiahship of the Redeemer. The divine grace was revealed in this call. Jesus sees what is in man regardless of name or profession.

2. Matthew's Response (v. 9). He acted with decision and promptness; he left his business behind him. When Jesus said, "Follow Me," Matthew perceived that greater than man had spoken to him. May we yield ourselves unto Him and render such simple obedience that our actions may be but the echoes of the divine voice in commanding. Two things in Matthew's compliance prove the genuineness of his conversion:

1. "He Left All" (Luke 5:28). Real conversion always results in the forsaking of all that is contrary to Jesus, such as illegitimate business, wicked associates and worldly pleasures, etc.

2. "Followed Jesus." Following Jesus means the commitment of one's life to Him for full salvation, abandonment of the will to Him to do whatsoever He wills, and a willingness to suffer, and even die, if need be, for Him.

III. Matthew Made a Great Feast (Luke 5:29-32). This feast was made in honor of his newly-found Savior. His conversion was so real that he wanted his friends to become acquainted with his Savior. He was not ashamed to confess his Lord before them. He showed real tact in making a supper. Men will come to a feast much more readily than they will to a sermon. A great company of sinners came, who doubtless had been Matthew's companions in sin. He now desired them to become his brothers in Christ. The Scribes and Pharisees were astonished that Jesus would appear in company with such a motley crowd of disreputable persons. They were too cowardly to speak to Jesus but they came to the disciples. Jesus championed their cause and battled His adversaries. His reasoning was unanswerable. A physician's place is among the sick. Only those who are diseased should come to the doctor's house. Since spiritual matters are of more importance than physical, Jesus was more than justified in being in the center of those who were morally sick that He might heal them of their maladies. He came to call sinners to repentance.

Our Conscience. If conscience smite thee once it is an admonition; if twice, it is a condemnation. Repose is as necessary in conversation as in a picture.—Hazlitt.

Intelligence and Charity. The brightest blaze of intelligence is of inculcably less value than the smallest spark of charity.—W. Nevins.

The Ground of Joy. We can do nothing well without joy, and a good conscience which is the ground of joy.—Sibbes.

American Farm Bureau

Bernard Downey (Boy With Cup), of Charlestown Township, Lee County Iowa, With a Part of His Champion Litter, the Best of Eighty Litters Shown at the County Hampshire Picnic at Donnellson. E. F. Renaud, Jeweler, Keokuk, Iowa (at Left of Boy), One of the 200 Business Men Who Helped Finance the Club, It Is Said, Will Stop Selling a Watch Any Time to Talk Hampshire Hogs.

MARKETING PROBLEM IS FINALLY SOLVED

Farm Bureau Service Extended to Co-Operatives.

President O. E. Bradfute of the American Farm Bureau Federation declares that the farm bureau and co-operative marketing must go hand in hand. This is merely an expression of a fixed policy of organized farmers. It found formal declaration at the fourth annual convention of the American Farm Bureau Federation, when it was ordered "to unify or co-ordinate all organizations, agencies and interests in behalf of a comprehensive and united program of co-operative marketing in the United States."

The present administration of the American Farm Bureau Federation has had no more important problem to

O. E. Bradfute.

solve than the one of working out a definite relationship between the farm bureau and the co-operative marketing movement. In every state in the Union this problem has been of chief concern to the men in positions of agricultural leadership. Every state farm bureau is asking for a definite method of carrying out the get-out policy.

For weeks and months the headquarters staff of the American Farm Bureau Federation has been studying the problem, of relationships between the co-operative marketing associations and the farm bureau. The executive committee at its last meeting emphatically favored the extension of farm bureau service to include the co-operative marketing associations.

Several weeks ago President Bradfute appointed committees to work out a definite plan for co-ordinating the service work of the farm bureau and the co-operatives. These committees submitted their reports to the entire headquarters staff. The result is the adoption of two suggestive contracts—one between the county farm bureau and the co-operative, and the other between the state farm bureau and the district or state-wide marketing association.

MARKET PECANS IN ALABAMA

Last Year 63,000 Pounds Were Disposed of by Central Growers' Association.

The Alabama Farm Bureau Federation is co-operating with the pecan growers of the state in working out their problems of production and marketing through the Central Alabama Pecan Growers' association, which marketed co-operatively last year 63,000 pounds of pecans.

CO-OPERATIVE PLAN GAINING POPULARITY

Rapid Growth of Selling Idea in All Parts of Country.

There has probably never been a period of as rapid growth in co-operative marketing of farm products in Ohio as that witnessed during the past three years, according to a statement issued recently from the offices of the Ohio Farm Bureau Federation. The movement is not confined to Ohio, say federation officials, but is a part of a rapid growth of the co-operative selling idea in all parts of the country.

In comparing co-operative efforts of farmers of Ohio with conditions of three years ago, the statement points out the fact that nearly every farm-produced commodity in Ohio is being co-operatively marketed in at least sections of the state, and that statewide co-operation is being used in marketing several of the major products.

Wool producers were about the only large group to have a state plan of co-operative selling three years ago. The co-operative marketing idea has spread during this period, and Ohio's system has been used by producers of other states as a pattern in making up their co-operative associations. Last year the growers' association handled close to 3,000,000 pounds of wool, and the selling of a still greater amount through co-operative channels this year is assured.

Three years ago there were a few local co-operative live-stock associations in the state. At the present time producers in about 70 counties are marketing through 61 county-wide associations and additional local groups. The total business reported from these co-operatives amounted to more than \$14,000,000 during the past 12 months. Two co-operative commission firms at terminals have been set up by producers of this and adjoining states.

About 32,000 dairy producers are selling milk, cream and other dairy products through co-operative associations in Ohio at the present time. These men are working through about twenty organized groups in different sections of the state, and while co-operation in the dairy field is probably the oldest form among farmers, only one or two associations were functioning successfully three years ago.

Growth from nothing to the handling last year of more than 160 cars of fruit is the record of the fruit co-operatives in the three-year period.

Co-operative marketing in the grain field has been largely confined to groups at local points, with the number of co-operative country elevators increasing during the past three-year period, and plans for combining in a larger group coming forward. Poultry and egg marketing has also been confined to small groups with larger associations expected to be developed in the near future.

Co-operative marketing of tobacco, seeds, sugar beets and a number of minor products has either been established or is being established at the present time.

AMALGAMATE AT SIOUX CITY

Nebraska Farmers' Union and National Live Stock Producers in One Association.

The inevitable trend of organized agriculture toward amalgamation is evidenced by the decision of the Nebraska Farmers' Union and the National Live Stock Producers' association to operate only one co-operative commission company at Sioux City, Ia. A plan for the amalgamation was presented to the union by John G. Brown, president of the National Live Stock Producers' association. It was unanimously passed by the board of directors of the union.

Daddy's Evening Fairy Tale

COPYRIGHT BY WESTERN NEWSPAPER UNION

MIDGIE MOONBEAM

Billie Brownie had taken his airship and had gone up to have a talk with Midgie Moonbeam.

Midgie Moonbeam loved to hear stories and she loved to tell stories and Billie Brownie liked to hear the news of Moonair as she liked to hear the news of Brownie-land.

"Now I have told you lots of the Brownie-land news," said Billie Brownie, as he sat on the edge of Mr. Moon's crescent shape

which turned up somewhat so that Billie felt safer than he would otherwise have felt.

"Yes, and I would be glad to hear the news of Moonair. I think that is more correct than saying Moonland."

"But tell me, Midgie, is there never any danger of falling down to the earth?"

"None whatever, Billie Brownie," said Midgie Moonbeam. "There is never any question about the moon falling to the earth, and he wouldn't treat his visitors any differently from the way he treats himself."

"That wouldn't be polite at all, and Mr. Moon is very polite."

"You need have no fears, Billie Brownie. Tonight, as you see, there is a great deal of beauty in the sky. That is because we are all going to have a banquet later on."

"You must stay for the banquet, too."

Billie Brownie was very much pleased. He could imagine nothing nicer than a banquet up in the moon. Even if he didn't get anything to eat it would be fun to see all the guests.

"From down below," said Midgie Moon, "it looks as though Mr. Moon in his crescent suit was floating in lovely fashion upon a pool of deep-blue sky water. This looks as though it were surrounded by very dark sky-shores and as though there were hills and shores and water up in Moonair tonight."

"Mr. Moon is looking very, very bright and shining. He has had his suit pressed and cleaned by the air tailors, Mooncloud & Co."

"Then the little Fleecy Cloud Fairies have come out and are dancing around, ready to come later on to the banquet."

"The other evening," Midgie Moonbeam continued, "we had such fun here."

"Mr. Moon had been asked to look at the new frocks of the Blue Cloud and the Gray Cloud young ladies. So Mr. Moon said the best way for him to do that would be to have the young Cloud ladies walk up and down in front of him so he could see them properly."

"They had no idea what was happening down on the earth and they said:

"See the blue and gray clouds going back and forth over the moon!"

"Wasn't that a joke? And dear me, dear me," said Midgie Moonbeam, "another very funny thing happened!"

"Some one asked a little boy named Eugene if he didn't think the moon was perfectly beautiful that evening and he said:

"Oh, yes, it's a delicious-looking moon."

"Mr. Moon did laugh when I told him that. It made him seem as though he were a piece of pie or something like that!"

"But now it is time for the banquet. Come along!"

Billie Brownie followed Midgie Moonbeam. They climbed up a little ladder which was held by many of the Moonbeam grandchildren while Billie and Midgie went up it.

When they reached the top they were right in the center of Mr. Moon's dining room.

He had a big dining-room table set with all kinds of strange dishes. It was covered with a beautiful fleecy cloud tablecloth.

He welcomed Billie Brownie and Midgie Moonbeam and then the other guests began to arrive. Many of the Clouds and Moonbeams were present and it was a very fine gathering.

And food? They had the most delicious of Moonair food, made by the Moonbeams. It was all cool food—quite lovely for a summer evening, and the midnight frosty ice cream was the best of all!

He Knew Too Well.

"Jones strikes me as a very promising young man."

"He strikes me that way, too; but he never pays it back."

SIEBERT AMAZED IT ENDED SO QUICK

"It surely is remarkable how quickly Tanlac fixed me up," declared Herman Siebert, well known auto mechanic, 125 Hennepin St., LaSalle, Ill.

"For about a year I had stomach trouble so bad I could scarcely eat anything and was losing weight and strength all the time. I ate only light food, but I couldn't digest it and always felt like there was a lump, like lead, right in the pit of my stomach. I was so nervous I could scarcely sleep any and felt so tired and worn out I could hardly drag myself to work."

"Well, Tanlac certainly fixed me up fine. I gained eight pounds, have an appetite like a horse and can digest anything and sleep well, too. In fact, I never felt better. I am glad to recommend Tanlac, for it made life and work a pleasure to me."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.—Advertisement.

Really Great Idea.

"What! You are planning to go to Vienna?" exclaimed Guttenach. "But that will cost you a fortune."

"Oh, not so much," replied the other. "You see, I'll have my youth restored by Dr. Steinach and come back on a child's ticket."

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

What's an Abecedarium?

This was a machine constructed by William S. Jevons and described by him in his "Principles of Science." It designed, by using symbolic terms, to perform analytic reasoning without making a mistake.

VILLAGE ORDINANCE NO. 230
AN ORDINANCE MAKING THE ANNUAL APPROPRIATION BILL FOR THE VILLAGE OF MOKENA IN THE COUNTY OF WILL AND STATE OF ILLINOIS, FOR THE FISCAL YEAR BEGINNING JULY 1, 1923, AND ENDING JUNE 30, 1924.

Be it ordained by the President and Board of Trustees of the said Village of Mokena:

Section 1. That there be and is hereby appropriated for the necessary expenses and liabilities of the Village of Mokena, in the County of Will and State of Illinois for the fiscal year beginning July 1, 1923, and ending June 30, 1924, the following amounts for the items hereinafter specified, respectively, to-wit:-

Redemption of Water Main Extension Bond No. 8.....	\$ 300.00
Redemption of Building Bond No. 8.....	200.00
Interest on Water Main Extension Bonds.....	45.00
Interest on Building Bonds.....	10.00
Interest on Water-Works Improvement Bonds.....	150.00
Interest on Corporate Indebtedness Bonds.....	75.00
Salaries.....	400.00
Police and Fire Department.....	300.00
Lighting.....	1200.00
Building and repairing fund.....	50.00
Streets and sidewalks.....	300.00
Oiling of Streets.....	500.00
Contingent fund.....	200.00

Total..... \$3730.00

Section 2. All unexpended balances of any item or items of any general appropriation made by this ordinance may be expended in making up any insufficiency in any item or items in the same general appropriation for the same general purpose, or in a like appropriation made by this ordinance.

Section 3. This ordinance shall be in force and effect from and after its passage, approval and publication according to law.

Passed this 25th day of July, A. D. 1923.

Karl E. Krapp

Village Clerk

I hereby approve the above and foregoing ordinance this 25th day of July, A. D. 1923.

Geo. J. Hacker

President of the Board of Trustees.

PAPER MONEY PIPE DREAMS

By JOHN OAKWOOD

Hitting the pipe seems like the greatest way in the world to get something for nothing—a whole paradise full of joy for a few whiffs of opium smoke. But—

By the way, the big lure about flat money is that it seems to promise about as much for nothing as a whiff on the pipe. They are just coming out of such a dream now in Germany.

Here is the way that German soft money dream goes. Say in 1913 a man put a ten year mortgage for 20,000 marks on his farm. Marks were then worth, in gold, about four to the dollar. The debt, therefore, was equivalent to about \$5,000.

In the ten years since that debt was contracted, the German Government has published, so to speak, trillions of paper marks. What happened? What would happen to the price of eggs if they had a hen at Washington laying a billion eggs a day—even if they put a government stamp on them saying eggs were worth a quarter a piece? German marks have gone down from four to the dollar to 120,000 to the dollar.

Here is where the pipe dream gets

FRANKFORT

Last Sunday Frankfort played the
McKenna Mills team of Joliet and
defeated them with a score of 2 to
23. It was simple walk away for
Frankfort.

The Daily Vacation Bible School
which has been conducted at the
Frankfort public school during the
past three weeks by Rev. Dunbar
of the Methodist church, finished the
course this week. On Friday evening
an exhibit was held in addition to
a program consisting of plays, mus-
ical numbers and other features.
Forty-two students were enrolled
and the average daily attendance
has been 25 students. Rev. Mr. Dun-
bar is much gratified with the splen-
did results which have been obtain-
ed thus far. At the close of the pro-
gram refreshments were served.

The Frankfort Epworth League
plans to visit the Elwood League
this Sunday and the New Lenox the
week following Sunday to see what
these Leagues are doing for the
summer. The Frankfort League also
plans to rent a cottage at the New
Lenox Camp grounds and to attend
the entire session of the Epworth
League Institute to be held there
from Aug. 19th to Aug. 26th.

Attorney A. H. Krusemark has
been in Kankakee this week on
legal business.

TINLEY PARK

Arthur Stehl and Henry Hick Jr.
mortored to Battle Creek, Mich. on
Tuesday July 17th to get some Ye-
pairs for the Red River Special
Threshing machine which is made
by the Nichols & Shepard Mfg. Co.,
located at Battle Creek. They report
that the trip was fine, but the grain
crops are rather poor. The grapes,
peaches, cherries, pear etc., are
getting along fine. They returned
again on Thursday.

MOKENA

A company of friends pleasantly
surprised Miss Alice Lucas in honor
of her 17th birthday last Saturday
evening. Games and other amuse-
ments constituted the pastime. Re-
freshments were served.

Born to Mr. and Mrs. Alfred Lor-
enzson who are visiting at the home
of the former's sister, Mrs. Herman
Schweser of Mokena, a son. The
new arrival has been named Robert
Lee.

Mrs. Sadie Moriarty of Beaver
Crossing, Neb. is visiting with her
sister Mrs. Lizzie Moriarty.

Mr. and Mrs. Wm. Semmler and
family, Mr. and Mrs. Hugh Dead-
more, Mr. and Mrs. John Oestreich
and the Theo. Oestreich family of
Joliet motored Wesley on the
Kankakee Sunday. A family picnic
was much enjoyed as were also
boat rides on the river.
visiting in Chicago Heights with
her daughter.

Mr. and Mrs. Albert Hentsch have
moved to Joliet where the former
is employed as an auto salesman.

Lutheran Immanuel Church
German services July 29 with
celebration of Lord's supper. Con-
fessional services start at 9:30 a.m.

August 5th we will observe our
annual mission festival. Two ser-
vices, the Rev. E. Tappenbeck from
Chicago will speak in the German
language at 10 A.M. The Rev. Hal-
ler from Kankakee will conduct
the English service at 7:30 P. M.
You are invited.

Remodeling work on the old
Aschenbrenner place recently pur-
chased by John Capple is being done
by J. R. Bowen.

Mrs. E. P. Krapp who was taken
ill with bronchial pneumonia while
visiting with her sister, Mrs. Stam-
mer, is improving nicely.

Louis Grater was operated on
for appendicitis at the St. Joseph
hospital at Joliet Tuesday. Dr. Mc-
Mahn having charge of the case.

Rev. and Mrs. Kemnitz mortored
to Ash Grove Tuesday to visit Rev.
Schultz, former pastor of the Luth-
eran church at Orland. Rev. Mr.
Schultz has just returned from the
Augustana hospital in Chicago
where he has been a patient a num-
ber of weeks.

Herbert Rix and Miss Clementine
De Ridder were the week end guests
of Hyacinth Heiman. Miss De Rid-
der is well known by some of Moke-
na's young people.

Popular African Bird.
The Cape canary is the only native
bird of Africa that is well known for
its sweet and continuous song.

Postal Employees' Holidays.
January 1, February 22, May 23,
and Christmas are the holidays that
are given to employees of the post-
office department.

More Than Talent Needed.
Talent alone cannot make a writer.
There must be a man behind the pen.

John Solomon, Incognito

By H. BEDFORD-JONES

Copyright by H. Bedford-Jones

A THOUSAND LITTLE TONGUES OF FLAMING FIRE

The man caught his breath as he looked down.

Lying bedded in a deep pad of black velvet, were four precious objects. Two of these were pinkish pearls, an evenly matched pair of great globules, staring up at the man with a soft luster as of concealed fire in their depths.

"The Gemini!" murmured Macarty in awed tones.

The third pearl was a most peculiar and extraordinary creation. It was not pure white, nor was it round. Instead, it was shaped like the moon just before the full—an elliptical form whose perfection was none the less remarkable. So, too, was its hue, which was a clear and most delicate clair-de-lune, transfused by that sheeny luster which comes only to the nacre of a pearl.

"The Sea-moon!" murmured Macarty.

He looked at the fourth gem—this one a stone, the Queen of Sheba, a pure white diamond as large as the nail on his little finger. From the black velvet, this thing blinked up at him with a thousand little tongues of flaming fire that licked at his brain.

With such jewels as these at stake, no wonder the search for them and the fight for their possession is fast and furious. Action marks this thrilling detective-adventure story which revolves about John Solomon, the famous detective whom H. Bedford-Jones has created and made internationally famous in his novels. And John Solomon, pudgy, humorous little Cockney to all appearances, deserves his fame. Even Sherlock Holmes has nothing on him when it comes to efficiency. In these adventures, which take place in the bayou country of the South, John Solomon is at his best.

And John Solomon is only one of many striking characters in the story. There's a lovely orphan heroine and a manly hero and two villain relatives and a desperado and a devoted superintendent and a Manchu of high degree. And there's love and mystery, and battle, murder and sudden death. You see, Aline Laverne has a rice plantation and the Macartys, father and son, are scheming to get it away from her and marry her to the son. And the jewels are believed to belong to Aline, as soon as anyone can find where her father has hidden them. So Aline's friend the Manchu sets John Solomon, incognito, to scheming for her. And she gets by chance an honest lawyer, the hero, who promptly falls in love with her and works like a Trojan.

Both the Manchu and the Macartys have connections with outlaws and latter-day pirates of the river and bayous. And these picturesque villains add color to the action and make it fast and furious; and over all hangs the sinister influence of the wonderful jewels. Men hesitate at nothing to seize and keep them—murder is a small price to pay. And then the surprise in the discovery of the real ownership of the gems!

CHAPTER I

In the old French quarter of New Orleans, there stands a house built by the great Marigny, who once owned all this portion of the town. This house has sheltered princes. Men numbering their slaves by the thousand have sat beneath its tapestries and sconces. Now it is a ruinous hovel. A musty bookstall huddles under its lordly porte-cochere; the bare brick walls echo to voices of foreigners. Against the bookstall snuggles a dingy restaurant, a cafe where one may buy Turkish or Chinese or Greek dishes, where the tables are filthy and unwashed.

At one of these tables sat two men, under the broken clock on the wall.

One was a Chinaman, or passed for such. In reality he was a Manchu who made his living by distilling illegal spirits down on the Gulf coast. Once he had borne princely titles. Now he was old, weary, diseased. Two things out of his past remained unchanged, being things of the spirit. One was the keen black eye, the other was the firm, resonant voice.

The second man was pudgy, cheaply dressed, small of stature. His hair was gray. His eyes were of clear china blue, set in a face absolutely devoid of expression. He seemed an inoffensive and cringing clerk, outworn and feeble. His voice held a cockney whine.

"So me old friend Adrien Laverne is dead!" he said. "I might 'ave knowed it. I'm growin' old, just like that. So Laverne is gone to 'is long 'ome! And 'e left a daughter?"

The Manchu assented. He was a man of severe dignity.

"He died very suddenly last winter," he responded in flawless English. "Fortunately, his daughter Aline has attained her majority."

"Oh!" said the pudgy little man. "Fortunately? And why so?"

"Because she has an uncle, David Macarty, and a distant cousin, his son Felix. Her uncle is a rapacious wolf. Her cousin is a vulture. And she believes evil of no man."

The white man digested this information slowly. He produced a plug of black tobacco, from which he whittled particles into a vile old clay pipe. At length he lighted this pipe and sighed wearily.

"You are a werry observing man, Mr. Ah Lee—by the way, 'ow did it 'appen as you went and took that 'ere name?"

The other shrugged lightly. "One name serves as well as another. My own I do not wish to use, as you know. This name satisfies white men, and those of my own race—"

"Ain't askin' questions, I see." The little cockney nodded. "As I was a-goin' to say, you're a werry observing man, just like that. But even a Manchu can make mistakes."

Ah Lee started slightly. He bent upon his companion a regard which was keen, stern, sharp and swift as a sword-stroke. One gained the distinct impression that he held the dictum of

this pudgy, blank-faced man in the highest respect.

"It is written," he replied almost humbly, "that the superior man does not disdain whatever advice may come to his ears."

The white man sighed wearily. "Adwice," he observed, "is all werry well in its place, I says, but I ain't got none to give, Mr. Ah Lee. Adrien Laverne was me friend, just like that! I knowed 'im well. And 'is daughter ain't no fool. She ain't one to be mistook about that 'ere Macarty."

"I have met her often. We have talked much together. She is a flower whose petals have not been touched by any harsh wind. I would do much to save her, Mr. Solomon."

The blue eyes of Solomon dwelt upon him in unruffled calm.

"And what 'as she got to be saved from, sir?"

"I am not sure." The Manchu leaned forward. He dipped his fingers in the dregs of his tea and upon the dirty tablecloth drew a faint outline.

"Here is Cypress Island on the bayou. The larger portion, so, is the Laverne plantation. This thin strip, across the bayou, is the Macarty plantation. During the war, David Macarty made much money. Whenever Miss Laverne comes to New Orleans, she comes in the Macarty steam yacht, with David or Felix Macarty as escort. She would believe no ill of them. Yet they have ruined her, and hold her in a net from which she cannot escape."

Solomon scraped out his pipe, carefully, and refilled it.

"And 'ow is that?" he inquired.

Ah Lee made it clear that he was speaking largely from hearsay. Most of his time was spent in the back bayous and canebrakes. There, in his business of making and selling arrack and rice wine, he was in constant touch with the numbers of outlaws who had refuge in the brakes; with the fishermen, white and brown and yellow, with the negroes and the Cajuns. Thus, what Ah Lee knew was only the gossip of the bayous.

"There is a man named Philbrick, John Philbrick," he said, "who is the overseer of the Laverne plantation. He is an old fool and a drunkard. None the less, he would give his life for Miss Laverne! Since the death of her father, Adrien Laverne, who made some very foolish contracts, this Philbrick has been fighting a losing battle. At the same time, he has been trying to keep the girl in ignorance of her financial condition. He has taken the entire load upon his shoulders in the effort to save her trouble and worry."

"Miss Laverne leaves all business to him. With him, the Macartys have had dealings. Now they are trying to get rid of him at all costs. Felix Macarty is down there now. I expect to hear any day that Philbrick has been poisoned or arrested or in some way got rid of, so that Felix may take over the place of overseer."

Solomon sucked at his pipe, then asked a wheezy question.

"And what's 'e after? Is 'e in love with 'er?"

"Undoubtedly. All men are," replied the Manchu simply. It was a plain statement of fact. "But this is not the ulterior objective. The Macartys want possession of the whole island, either by marriage or otherwise. Their reason, I do not know. It is a mystery."

Again there ensued a slight silence.

"So she is up 'ere with 'er blessed uncle, is she?" asked Solomon.

"Yes, for a week of the opera. I understand. David Macarty is her great-uncle, I believe; at least, the relationship is not close. It is a great pity that the girl is so dependent on John Philbrick. That man is weak—a weak stick on which to lean. He means well, and he is sincere. However, he is not equal to his task. He is not equal to fighting the Macartys. They have great influence. I imagine that the girl was brought here for a time so that Felix Macarty, who remained at the island, might remove Philbrick. The old fool is a dreamer, is drunk most of the time, and is terribly afraid of the Macartys. Yet he fights!"

The expressionless face of Solomon showed a faint trace of a smile.

"Even a Manchu can make mistakes!" he said again. "A dreamer—afraid—and yet 'e fights! That 'ere Philbrick ain't such a bad sort."

Disquiet flitted across the wrinkled features of Ah Lee. This phrase on the lips of Solomon, so obviously a gentle rebuke, seemed to render him uneasy. He leaned back in his chair, brought forth a cigarette case, and lighted a cigarette. His black eyes searched the once more expressionless face of Solomon.

"While I'm a-thinkin' about it, Mr. Ah Lee," and the blue eyes struck up suddenly, "I suppose you ain't been an' found anything o' that 'ere man you've been wantin' to find a mortal long while? That 'ere Cap'n Wrexham?"

Something moved in the face of the Manchu—rather, underneath the face. It was as though the name of Wrexham provoked, deep inside of him, some terrible convulsion.

"Yes," he answered, quietly. "Yes. We shall come together before long. I may wait a long time to pay my debts, but ultimately they are paid."

The blue eyes rested reflectively upon that wrinkled, powerful face.

"You 'ave friends all about the world, Mr. Ah Lee?"

"You also have," retorted the Manchu, with a smile. "I have not known you long, yet I have known of you for a long time."

Solomon chuckled wearily. "Well, now, what about this 'ere David Macarty? What's the name of 'is blessed craft?"

"She is called the Watersprite. A small motor cruiser—"

"Does she 'ave a steward?" interjected Solomon.

"Yes."

Again a space of silence. These two singular men regarded each other for a long while. What thoughts were

Ah Lee Made It Clear.

passing behind that wrinkled saffron mask, behind that blank and pudgy countenance, remained a mystery. At length Solomon tapped his pipe empty and broke the silence.

"If so be as I might ask a bit of 'elp from you, sir—"

"My friend," said the Manchu earnestly, "I am at your service, with all that I have! Especially if it is a question of helping Miss Laverne."

"That's it," assented Solomon. "I want this 'ere steward took off Macarty's craft, and I want it done mortal quick. This werry day! I want 'im to up an' disappear, just like that. I'll cost some money; 'ere's a thousand dollars—"

The Manchu dignifiedly pushed back the roll of bills which Solomon produced.

"Let no money pass between us. This is a matter of our friendship, and of Miss Laverne. Am I a poor man? Nonsense! Soon I shall be dead, and I wish to see her in safety."

"Werry good," said Solomon placidly. "But if you and me is a-goin' into partnership on this 'ere deal, it's likely to cost you more'n money."

"What do you mean?" The Manchu gave Solomon a quick, sharp glance.

"I don't rightly know." Solomon remained impassive. "But I 'ave a notion that Providence is a-workin' things out, Mr. Ah Lee. Sometimes Providence don't like to see a man payin' of 'is own debts. If so be as you want to draw out—"

"My word is never taken back," said the cold Manchu. "That steward shall vanish today."

"Werry good, sir. Does Macarty or 'is skipper 'ire 'is crew?"

"Macarty is his own skipper. It is his hobby."

"So much the better. And where's 'e stoppin' at?"

"At the St. Charles, with Miss Laverne. Some engine work is being done on the yacht."

Solomon pushed back his chair. "And 'ow long are you a-goin' to be in town?"

"Only a day or so. I am arranging to market a consignment of arrack. Those two Arabs you sent me are good men; I owe you thanks for them. They know the work. By the way, I think that on this trip Miss Laverne is arranging to mortgage some property of hers in Latouche. Macarty's game may be to force her to marry his son, or to sell him the plantation. I have discovered nothing of it."

Solomon nodded with his complacent air.

"Werry good. I'll 'ave me eye on things, thankin' you kindly."

The two men left the restaurant and separated.

Solomon, who walked a bit stiffly, made his way back to Canal street and hailed an empty taxicab. He handed the driver a large bill.

"Motor up an' down," he ordered the astonished driver. "Anywheres you like. I want to think, just like that!"

He popped into the cab and lighted his pipe. For a space he sat motionless, while the car took the route out to Metairie, then he removed his shabby cap and shook his head.

"Dang it, there ain't no use to this 'ere thing!" he muttered. "Except for that there Ah Lee, I'll 'ave to play me own 'and. I'm a-gettin' old, and I ain't what I used to be. Just because 'er father was a werry good friend o' mine is no reason for me makin' a bloody fool of myself! But that's just what I'm a-doin' of this blessed minute."

He puffed in reflective silence. Then he spoke again.

"I'll 'ave to depend on Providence, just like that! Providence ain't never yet failed to make good, I says, and ain't likely to start in bein' a failure at this late date. Yes, sir! Just you trust in Providence an' do your mortal best to be 'appy, as the old gent said when 'e buried 'is third."

"So I'll go ahead with me plan. That there Ah Lee is a werry good man in 'is own way, too. But even a Manchu can make mistakes. An' 'e went an' made two this blessed day—first about Miss Laverne, and next about that 'ere Philbrick."

The taxi drove on.

At five-thirty that evening, Mr. John Solomon called at the St. Charles and sent up his card to Mr. David Macarty. With it, he sent word that he wished to apply for the position of steward aboard the Watersprite.

At five-fifty, David Macarty had engaged his new steward.

CHAPTER II

When the knock of destiny sounded at his door, Jack Fortier was discharging his typist.

"It's no use, Miss Smith—have to tell you the truth!" he said cheerfully. "Six months without a paying client has busted me. I'll have to take down my shingle and get a job in somebody's office."

The typist took the proffered check, with some embarrassment. She liked this husky young lawyer from the back districts. She was sorry to see him acknowledge failure.

"Perhaps," she faltered, "perhaps a week or so—I could do without—"

"Bless your soul!" exclaimed Fortier heartily. "Nothing doing that way, my dear girl! I wouldn't have it. I thank you, in any case; I appreciate your offer—"

At this instant came the rap at the door of the inner office. Both Fortier and Miss Smith started.

"No chance! It's somebody with a bill I'd forgotten. But you might see who—"

Miss Smith opened the door.

"Is Mr. Fortier here?" inquired a voice. "There was no one in the outer office—"

"Come right in, please," said the typist. "Very well, Mr. Fortier. I'll get out those letters immediately." The glance she flung Fortier was roguish. She disappeared.

Fortier held a chair for his visitor. He felt helpless, disconcerted before

this vision. Perhaps she, on her part, felt a bit disconcerted over the youthful appearance of the lawyer. He was rather square of feature—those odd angles of a new generation in the city, a generation not worn down into the mold of citied life and form.

"I am at your service, madame," he said formally, and dropped into his swinging chair.

"You are not the Mr. Fortier I expected to see," she said quietly. "They told me at the bank that you were an elderly man."

"The error has happened many times, madame," he said. "The other

Solomon Nodded.

Fortier has offices on the floor above this. May I conduct you?"

"No," she said, leaning back in her chair. "No. Sit down, please. I—I must think a moment. I believe that I could trust you."

Jack Fortier sat down again. He was tremendously astonished, even agitated—that last sentence of her speech had held a remarkable simplicity. He perceived that he was dealing with no ordinary person, no woman who concealed her thoughts deftly. This girl was very frank. The gray eyes which she had bent upon him were startling in their clarity. It seemed to him that she must be reading into his heart.

"Excuse me," he said, "but—but I cannot take advantage of a mistake—"

"Please be quiet a moment," she said calmly. "It is I who am taking advantage of it."

Fortier leaned back in his chair and endured her scrutiny.

He gave her look for look—who could help it? And it speaks well for him that, under his steady regard, the girl felt no twinge of evil. Women feel such things strongly from the eyes of men.

Fortier knew that his own strong-willed aloofness was reeling under the very shock of her presence. He had never seen another such person in New Orleans. A girl indeed, yet matured beyond her years by southland suns, frail and delicate as finest steel, a fair flower crowned by waves of brownish hair and lighted by eyes of golden gray.

It was, for Jack Fortier, a moment of destiny. With her presence, he became aware that a sudden peace and sweetness had descended upon this office of his, this bare room. You have seen the Chinese magnolia, that slender tree, and you know how it perfumes a whole garden with the richest, most rare and subtle of all scents! So Aline Laverne sat here, and from her exquisite spirit came a poised richness into all his world.

So strong was her personality, that, silent, she still dominated. Even then, in this first moment, Fortier sensed how she was going to startle and confound him, and leave him aching with the hurt of loving her; and not him alone, but all who came into contact with the calm peace of her level eyes.

"I should like to know," her voice awakened him, "who you are and where you come from, Mr. Fortier. I am very uncertain whom I can safely trust. You will pardon me—"

Fortier's air made this seem quite the usual thing from client to attorney. "It is simply told," he said, smiling a little. "I have done my reading in the back country—in the office of Judge Salzon, in St. Landry parish. Six months ago I was admitted to the bar and came to New Orleans. I have been here six months. I know nobody. I have not had a client except in a few charity cases. I have had little experience. If you need a very capable attorney, I should suggest that you see the other Fortier—"

"I am not taking this case for money, Miss Laverne!"

(TO BE CONTINUED.)

Divine Requirements

By REV. E. L. MCCREERY

Teacher of Phonetics and Comparative Religions, Moody Bible Institute, Chicago.

TEXT—If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land.—II Chronicles 7:14.

King David died with a great ambition of his life unrealized. It was

In his heart to build the temple at Jerusalem for the worship of the true God. Great preparation was made during his lifetime; but it was left to his son Solomon to actually build and dedicate the temple at Jerusalem.

The day of dedication was a great day. The bringing in of the

Ark of the Covenant of Jehovah into its place was marked with sacrifice, thanksgiving and praise. The answering token of approval from Jehovah came in the cloud which filled the temple (5:14) and in the fire which came down from heaven and consumed the burnt-offering and the sacrifices (7:1).

"And Jehovah appeared unto Solomon by night, and said unto him, I have heard thy prayers, and have chosen this place to myself for a house of sacrifice" (7:12). He then announced a solemn warning in case they forsake Him. It was in connection with these events that Jehovah himself set forth the divine requirements essential to a spiritual revival. In verse 14 Jehovah says: "If my people who are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land." There are three things to be noted:

1. Those concerned.—"If my people." The promise of a revival is not to the world nor to those of the world. It is confined strictly to God's own people. To revive is to bring back, from a state of languor, depression or discouragement, to a state of health or cheer. Only those can be restored to God's favor who have formerly experienced that favor. All spiritual revivals, therefore, primarily concern God's own people. But the outreach must be to the unsaved round about.

2. The four conditions specified.

a. "Humble themselves." The spirit of humility is manifest only among those who feel an insufficiency in themselves. It betokens a dependence on a higher power. To the child of God it means a looking to Him to supply that insufficiency.

b. "Pray." The companion of humility is prayer. Prayer expresses the terms of our need to the higher power. If we have strayed from Him, His favor can be restored only when we ask it. God does not intrude. He comes to those who desire Him.

c. "Seek my face." How we all desire the presence of those we love. How we long to be near our children and to have them near us. The consciousness that we may quickly be in their presence is a comfort and a solace. So should we desire God's presence. In His presence we discover sin (Isa. 6:5), and learn His will for us (Ps. 143).

d. "Turn from their wicked way." True sorrow for sin finds expression in forsaking sin. The one who goes on in his sin has not repented. Repentance goes deeper than verbal expression; it goes down to the rooting out of sin. God would therefore seek in the one way He desires to be restored, a manifestation of the sincerity of that desire.

3. The blessing promised.—This is threefold: "Then, will I hear from heaven, and will forgive their sin, and will heal their land." "Then"—the time element is vital and indicates a sequence, following the conditions specified.

a. "I will hear." Prayer will be heard. The door of heaven is shut, the clouds of despair and depression overhang—the lightnings of His fierce anger strike terror to the heart—because there is that inner consciousness of separation from God. With the assurance that He will hear from heaven comes the consciousness of acceptance with Him—the knowledge that there is favor in His presence.

b. "Will forgive their sin." Sin will be forgiven. It is the confidence of pardon which brings hope and light to the convict. The penalty whose execution has been impending is now taken away. The past is blotted out—a new page opens in the book of life.

c. "Will heal their land." The curse of sin will be removed. Sin brought its curse not alone on the one who sinned, but the land was cursed thereby so that it brought forth thorns and thistles. One of the tragic things about sin is its train of consequences. To the student of prophecy the hand of God stands out clearly in Palestine, that land once flowing with milk and honey—now one of the desolations of the earth. Why? The answer is "sin." What a testimony to the faithfulness of God's word. The obedience of God's people brought blessing to the land. Their departure from Him removed that benediction. Only return to Him will restore it.

Thus He waits to bless those who fulfill the divine requirements.

PROPHET TOLD OF LOCUSTS
Joel Warned People of Their Coming,
Three Thousand Years Ago—Ci-
cades Less Numerous.

The locust has been a plague to man-
kind for centuries.
"The land is as the Garden of Eden
before them," said the Prophet Joel
almost 3,000 years ago, "and behind
them a wilderness; yea, nothing shall
escape them." He described the com-
ing of the locusts as "a day of cloud
and thick darkness; as dusk spreads
over the mountains."

The periodical cicades, some of
which appear every 13 and others ev-
ery 17 years, do not devastate the land
they pass over in the same degree as
locusts that descended from the arid
steppes of Asia. Periodical cicades
are growing less numerous owing to
the cutting down of forests. The eggs
are laid in tender twigs of trees, and
if no trees are at hand their propaga-
tion is prevented to a large extent.
Birds are enemies of the insects, es-
pecially the English sparrow. No rem-
edy is practicable against them in large
numbers over large areas.—Detroit
News.

Or Rare Combination.
"Yes, she's married to a lawyer, and
a good, honest fellow, too."
"Bigamist!"

A man makes his mark and then
his wife is apt to make him toe it.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising.)

A Selective Portable.

There is an unlimited field for good
single tube portable set circuits. Any
regenerative type of circuit will give
good volume on a single tube. The
main problem is to use a type of tun-
ing unit that will permit maximum se-
lectivity. In the hook-up illustrated a
variocoupler is used in conjunction
with a variable condenser for the tun-
ing unit—the rotor supplies the feed
back of the plate circuit.

The circuit is not primarily intended
for loop aerial reception, although one
end can be connected to the antenna
post, the other end left open, and a
regular ground connection used.
When so connected, some very good
results are possible. If a straight wire
aerial is used, a length of 50 feet can
be thrown over a convenient tree. Of
course this will not give the best re-
sults. If time is available, the wire
should be suspended between insulat-
ors.

A copper rod driven into moist
ground will give sufficient ground con-
nection. This can be improved by

soaking the ground around the rod with
salt water.

The tuning condenser should have a
capacity of .001 microfarad, to cover the
increased wave length range. The ro-
tating plates should be connected to the
ground side. A blocking condenser
of .005 microfarad capacity is inserted
in the rotor circuit so as to avoid short
circuiting the batteries through the
plate circuit.

The grid leak can be of the variable
type, but this is left to the option of
the maker. The tube is a detector, al-
though hard tubes such as the C301A
can be substituted. In such a case it
may be advisable to increase the plate
battery voltage. A cushion mounting
for the tube socket is recommended, as
a portable set gets considerable knock-
ing around that does not help preserve
the tube filament.

The rheostat resistance will depend
on the type of tube used. If a UV199,
C301A, or UV201A is used a 20 to 25-
ohm rheostat is required. Otherwise
the standard 6-ohm rheostat is suffi-
cient.

Snap Fasteners Are Aid to Experimenter

The small snap fasteners for dresses
that are sold in five and ten-cent stores
for five cents a dozen may be put to a
great many uses by the radio experim-
enter.

The accompanying sketches show a
few of the uses to which they can be
adapted. These fasteners make very
neat binding posts and by using dif-
ferent sizes and different halves of the
fasteners the set can be made so that
it is impossible to connect it up wrong.
By soldering one-half of the fastener
on the phone cord and the other half
on the panel with a common pin as
shown, the phones can be plugged in
quickly and if the cord gets a strong
pull they will release and not pull the
set off the table. A very good multi-
point switch can be made by pinning
to the panel as many points as wanted
in a circle and also one at the center
of the circle, and then with the two
halves of the fastener soldered onto a
strip of copper at a distance equal to
the radius of the circle a switch arm
can be made. The fastener in the center
makes a good swivel and when the
right point of the switch is found in
tuning the other fastener can be

pushed home, making almost a posi-
tive contact.

Another use made of the fasteners
is in mounting home-made honeycomb
or spider-web coils. Fasten one part
of the fastener on both top and bottom
of the coil form and solder the ends of
the coil to them. The other half is
soldered to a strip of copper or brass
that acts as the arm to swing them on.
This form of mounting is very handy
if much changing of the coils is made
for it works so quickly. A good con-
nection to the end of the variocoupler
or variometer rotor shaft may be
made by soldering a fastener on the
end and the other half to a flexible
wire.

No doubt other uses will occur to
the experimenter. They are cheap and
make a good contact and provide a
neat appearance.

Device to Make Your Headband Comfortable

Put the phones on the head and
measure the distance from one adjust-
ing screw to the other. Cut a piece of
canvas 1½ inch longer than this dis-
tance, and ¾-inch wide with a hole in

each end and fasten to the adjusting
screws. The headband is then ex-
tended and the adjusting screws tight-
ened, leaving the weight of the phones
on the canvas strip while the headband
presses the phones on the ears and at
the same time leaves the user in com-
fort as the metal strips do not touch
the top of the head.

Use Telephone Jacks for Contact Switches

Another evidence of the cleverness
of the radio amateur is the making of
a compact and neat multiple contact
switch for panel mounting from ordi-
nary telephone jacks. Such switches
possess the desirable feature of taking
up a minimum of panel space, are easy
of installation and require but one
hole in the panel. Most of the tele-
phone jacks are constructed with sil-

ver or platinum contacts, affording
very low resistance.

In order to adapt the jack, it is only
necessary to make a plunger of some
insulating material, preferably of
bakelite rod, of the approximate di-
mensions shown in Fig. 1. A hole
drilled through the plunger as at "a"
and having a small piece of stiff brass
wire inserted in it, will prevent the re-
moval or loss of the plunger when in
the "out" position.

The uses to which such a multicon-
tact switch can be put are manifold.
The accompanying diagram shows the
correct method of connecting it for
changing the antenna tuning con-
denser for series or parallel connec-
tion, although other uses will no doubt
suggest themselves to the experi-
menter. A further advance in panel-
neatness can be attained through
stamping the head of the plunger with
lettering corresponding to the use to
which the switch is put, rather than
engraving the panel surface.

Carborundum-Silicon Crystal Stand Model

For the construction of a carborun-
dum-silicon detector, the parts re-
quired are one piece of silicon, one
piece of carborundum (crystal form),

one piece of wood 2½ by 1½ inches,
one piece of spring brass 2½ by ½
inch, one crystal cup, one brass bolt
and nut ¾ inch, one screw ¾-inch
long and two ¾-inch flat head thread
screws.

Bend the brass into shape as shown
in the sketch, and drill one screw
hole; also drill a 17-32-inch hole; sol-
der the nut and drill 3-16-inch hole in
one end of ¼-inch screw; fill this with
solder and set carborundum in the
solder while it is still hot. The crystal
cup may be of any model. The car-
borundum must set very hard on the
silicon, thus preventing the spot from
being lost. This type of detector will
keep the spot through the heaviest of
thunderstorms, and one may even
pound on the table.

"B" Battery That Holds Its Charge

Only Small Amount of Ma-
terial Is Necessary to
Construct.

A home-made "B" storage battery
which will hold its charge any length
of time is a novelty.

The materials required are two
shingling hatchets, or a heavy hammer
with a corrugated head, and a cor-
rugated or pitted plate of iron or steel
or any metal harder than lead.

On the head of most shingling
hatchets will be found a design very
useful to battery making. It resem-
bles a plate with small cross-wise
grooves, which make an impression,
with the grooves as small ridges as
in Fig. 1, leaving small pits about one-
eighth-inch square.

If no shingling hatchet is procur-
able, cut cross-wise grooves with a file
about one-sixteenth inch deep and
about one-eighth inch apart on the
head of a hammer (or on a block of
metal suitable to hold in the hand)
and with it strike the lead plate a
heavy blow. Then cut another set of
grooves exactly at right angles to the
first set of grooves, forming a criss-
cross pattern.

The plates should be sheet lead
about one-sixteenth of an inch thick
and of a size convenient to the jars
or test tubes used for containers.

Now put one hatchet or the pitted

Good Storage "B" Battery That Has a
High Capacity.

plate in a groove on your workbench
or in a vise, with the rough side up,
then place the strip of lead on the
plate and hit it heavily with the other
hatchet or hammer. Upon examination
a print will be found similar to Fig. 2.

The short ribs which run cross-
wise give mechanical strength, while
the increased surface gives much more
electrical capacity.

Continue the stamping until the
whole surface to be immersed is
printed.

After the battery is put together
and the electrolyte is poured in,
it should be charged. For a 224-volt bat-
tery this should take about thirty min-
utes the first time, then it should be
discharged as quickly as possible.
When almost completely discharged
the circuit for charging should be
again connected, but in a different di-
rection from the first charge.

When this alternation of the direc-
tion of the current has gone on for
about five times the plates will be
found to be of a spongy consistency
between the short ribs, owing to the
decomposition of the matter in the
plates under the electrical action.
After five changes the maximum of
surface will have been obtained and
the best results given. However, this
alternation should not be continued
longer, as the ribs will begin to de-
compose and the mechanical strength will
be so weakened that the plates will
soon fall to pieces.

A battery of these cells may be con-
structed to deliver 150 to 300 volts for
power amplifiers and low range trans-
mitters. Although such a battery
would involve considerable work it
would well repay the constructor by
the efficient operation obtained.

Amateur Will Find Rheostat Easy to Make

The materials needed to make this
rheostat are a composition dial, some
resistance wire, a small strip of brass,
and some screws and mica disc. Wind
the resistance wire on a 3-16-inch rod;
when the coil is wound on connect one
end to the brass backing inside of the
dial and cut the other end off about ¼
inch from the set-screw that runs from
the top of the dial to the bushing. Cut
out a round piece of thick mica large
enough so that the wire will fit tightly
on it, and then groove the mica. Cut
out a hole in the center of the disc
so it will fit snugly over the bushing,
and drill a hole the size of this set-
screw parallel with the disc. Put the
set-screw in and this will hold the disc

on the dial. Punch two holes in the
disc where the two ends come and con-
nect one to the bushing. This serves
as one contact and the other contact
is made by the small brass strip that
is fixed on the panel.

RECORD IN CROPS

Western Canada Farmers As-
sured of Bountiful Yields.

Conditions Reported From All Parts
of the Provinces Satisfactory in the
Highest Degree—Pass Expectations.

From as early as April 17, when
seeding became general throughout the
Western Canadian Provinces, was
there anything but optimism in the
feelings of the farmers of that coun-
try. An uninterrupted chain of favor-
able conditions have bound the early
seeding data with the conditions of
the crop today. There were no set-
backs. There may have been a hail
storm or two with some ill effects
through portions of the country, but
the track they took was so small
that the percentage of loss was al-
most imperceptible compared with the
whole. Rains fell just when needed,
the sun shone as if regulated by the
farmer himself, the ground, generally,
was in perfect condition and fully re-
sponsive. It is now a question of rivalry
between districts and provinces
which will produce the greatest re-
sults in crop yields and averages. Out
in Alberta, whether it be in the north
or in the south, that which gave as-
surance, in a well-prepared seed bed,
of an excellent crop is passing expecta-
tion, and experts say there will be
produced a crop away greater than
ever before in the history of the prov-
ince, and Alberta has had some big
yields. Then, in Saskatchewan there
exist the same conditions. The ex-
treme north and extreme south will
vie with the east and west in the
story at harvest and threshing time.

Manitoba, while not boastful, com-
placently watches fields of wheat,
oats, rye and barley that promise to
set a new record for that province.
The fact is apparent that Western
Canada will have a crop yield in all
grains away ahead of any year in the
history of the country. This will be
pleasing news to the thousands in the
United States, who have friends and
relatives farming in that country. It
should not be forgotten that these
crops will be raised on land that in
many cases cost less than \$40 an acre
and some of it was procured by mere-
ly homesteading. It is possible today
to secure improved farms at very low
figures, as well as raw or virgin
prairie. Any Canadian government
agent will gladly give information as
to the condition of the crops, and
dates when special rates may be had
by those who wish to look over what
is probably one of the greatest grain
fields on the continent.—Advertiser.

Elsewhere Sometimes.

The village was having its spring tea
party and was getting rather tired of
it. Finally they decided to propose
conundrums and one of the company
asked, "Which is the most warlike na-
tion?"

"Vaccination," replied the village
doctor, who was one of the party.

"How do you account for that?" said
the man who had put the question.

"Because it's nearly always in arms,"
said the medic.

\$175,693,000 in Farm Buildings

VISITORS to Chicago gaze admiringly at the Wrigley Building, with its huge white tower silhouetted against the skies. Erected at vast cost this building stands a monument to progress. Just mentally picture fifty Wrigley Buildings and you will gain an idea of the value of farm buildings in the 15 counties served with gas or electricity by this Company.

The farm buildings in this territory are valued at \$175,693,000, an amount equal to the combined capitalization of the largest ten national banks in America.

This vast investment in farm buildings is indicative of the great agricultural wealth, which with other natural resources of this area, are back of the securities of this Company.

The Public Service Company furnishes services of a nature so essential to the agricultural, industrial and residential development of this territory, that the prosperity and future growth of Northern Illinois and the Company are largely inter-dependent.

ORDINANCE No. 229.

AN ORDINANCE PROVIDING FOR THE ISSUANCE OF STREET IMPROVEMENT INDEBTEDNESS BONDS OF THE VILLAGE OF MOKENA, TO THE AMOUNT OF TWENTY-NINE HUNDRED (\$2900) DOLLARS AND PROVIDING FOR THE PAYMENT THEREOF.

WHEREAS, The Village of Mokena, in the County of Will and State of Illinois, has become indebted for the surfacing and repairing of certain streets in said Village, and which indebtedness the Village of Mokena desires to pay, therefore

BE IT ORDAINED by the President and the Board of Trustees of the Village of Mokena, in the County of Will and State of Illinois:

Section 1. That for the purpose of paying the indebtedness incurred by the Village of Mokena, in the County of Will and State of Illinois, for the surfacing and repairing of certain streets in said Village there are hereby authorized to be issued one Street Improvement Indebtedness Bond of Four Hundred (\$400) Dollars and five Street Improvement Indebtedness Bonds of Five Hundred (\$500) Dollars each, all to be dated September 1, 1923, each bearing interest, evidenced by coupons, at the rate of five (5) per centum per annum, payable annually, except the first interest, which shall not be payable until September 1, 1925. The bond for the principal sum of Four Hundred (400) Dollars shall become due on the 1st day of September in the year 1925 and one of each of said Five Hundred (500) Dollar bonds shall become due on the 1st day of September in each of the years 1926, 1927, 1928, 1929, and 1930, respectively.

Section 2. The bonds hereby authorized shall be in substantially the following form, except as to amount: UNITED STATES OF AMERICA
STATE OF ILLINOIS
VILLAGE OF MOKENA.
STREET IMPROVEMENT INDEBTEDNESS BOND OF THE VILLAGE OF MOKENA.

No. \$500.00
KNOW ALL MEN BY THESE PRESENTS, That the Village of Mokena, in the County of Will and State of Illinois, acknowledges to owe and for value received hereby promises to pay to bearer Five Hundred (500) Dollars on the first day of September, A. D. 19.., with interest thereon from the date hereof at the rate of five (5) per centum per annum, payable annually on the first day of September in each year, upon presentation and surrender of the annexed interest coupons as they severally become due. Both principal and interest of this bond are hereby made payable in gold coin of the United States of the present standard of weight and fineness at the Mokena State Bank, in the Village of Mokena, in the County of Will and State of Illinois.

This bond is one of a series of like tenor, except maturity and amount, issued for the purpose of paying the indebtedness incurred by the Village of Mokena for the surfacing and repairing of certain streets in said Village under the authority of Chapter XXIV of the Revised Statute of the State of Illinois, and of an ordinance of said Village of Mokena duly passed, and is further authorized by an election duly called and held.

It is hereby certified and recited that all acts, conditions and things required to be done, precedent to and in the issuing of this bond have been done, happened and been performed in regular and due form as required by law, and that the total indebtedness of said Village of Mokena, including this bond, does not exceed the statutory or constitutional limitations.

IN WITNESS WHEREOF the Village of Mokena, Illinois, has caused this bond to be sealed with its corporate seal, signed by its President, attested by its Village Clerk, and has caused the annexed interest coupons to be executed by said officers this first day of September, A. D. 1923.

Attest:-

Village Clerk.
COUPON
No. \$25.00
On the first day of September, A. D. 19.., the Village of Mokena, Illinois, promises to pay to bearer Twenty-five (25) Dollars in gold coin of the United States at the Mokena State Bank, in the Village of Mokena, Illinois, for interest due that day on its Street Improvement Indebtedness Bond dated September 1, 1923.
No.
President.
Village Clerk.
Section 3. That for the purpose of

providing for the payment of the principal and interest of the bonds hereby authorized as they respectively become due, there shall be and there is hereby levied and there shall be collected a direct annual tax upon all the taxable property in the Village of Mokena, in the County of Will and State of Illinois, sufficient to produce the following sums for the following years:-

For the year 1924, the sum of \$690.00
For the year 1925, the sum of \$625.00
For the year 1926, the sum of \$600.00
For the year 1927, the sum of \$575.00
For the year 1928, the sum of \$550.00
For the year 1929, the sum of

And provision to meet the requirements of this section shall be included in the annual appropriation bill for each of the years aforesaid. And the said Village of Mokena hereby obligates itself annually in due time, manner and season, to perform and take all action required by law to carry out the provisions of this section.

Section 4. The bonds authorized by this ordinance shall not be issued unless this ordinance is approved at a special election for that purpose, and which special election is hereby called to be held on the 25th day of August, A. D. 1923.

Section 5. This ordinance shall be in full force and effect from and after its passage, approval and publication.

Passed this 23rd day of July, A. D. 1923.

KARL E. KRAPP,
Village Clerk.

I hereby approve the above Ordinance this 23rd day of July, A. D. 1923.

GEO. J. HACKER,
President.

ANNUAL REPORT OF THE TREASURER, VILLAGE OF MOKENA, WILL CO., ILL.

STATE OF ILLINOIS,
WILL COUNTY, SS:-
Office of the Treasurer of the Village of Mokena.

The following is a condensed statement by John Liess, Treasurer of the Village of Mokena, in the County of Will and State aforesaid, of the amount of public funds received and expended from April 1, 1922 to the first day of July 1923, the end of the fiscal year.

1922	Amount
April 1 Cash on hand	\$256.42
C. R. I. & P. Ry Co.	
Water for locomotives	1162.22
Same for light	129.30
Private Parties	
for water	544.15
Automobile License	14.00
Refunded freight	20.90
Garage Licenses	45.00
Insurance Taxes	57.61
Soft Drink, Ice Cream, Candy and Tobacco,	
Cigar Licenses	345.00
Peddler License	9.00
Dog License	19.00
Sale of old grader	8.00
Sale of old engine	30.00
Fines	45.00
B. D. Jones, Co. Treas.	
for taxes	3420.16
Mokena State Bank,	
Bond Sale	1500.00
Geo. A. Bissel, Co. Treas.	
to apply on taxes	1000.00
Check returned	94.38
Total receipts	8700.14

EXPENDITURES	
Public Service Co. for light and power	\$1949.20
Mokena State Bank paid tax levy warrant No. 1 & int.	993.22
Same paid tax levy warrant No. 2 & int.	461.92
Same paid water main ext. bond No. 6 and bldg. bond No. 6 & int.	605.00
Same paid int. on \$3000 bond	150.00
Same paid water main ext. bond No. 7 and bldg. bond No. 7 & int.	805.00
Paid for stone, gravel, sand & freight on same	646.67
Paid for building material	72.39
Insurance taxes paid to firemen fund	57.42
Oil for streets	23.55
Oil and gasoline	9.35
Painting water tank and tower	137.00
Cinders	4.00
Insurance	18.06
Coal and sewer pipe	46.76
Police Salary	400.00
Printing	125.08
Rewriting ordinances	50.00
Lamps	1.32
50 Auto. license plates	25.25
Books & Stationery	58.00
Election expenses	30.00
Repairs	79.61
Legal advise	77.00
Treasurer's Commission	106.12

Officers salaries..... 330.00
Refund for tapping water main 135.00
Refund on sidewalk 7.50
Taxes refunded to Joseph Kohl 95.85
Same to Karl E. Krapp 8.64
Illinois Municipal League dues 5.00
Contribution 25.00
Labor 517.63

Total expenditures \$8051.54
1923
July 1, Cash on hand..... \$648.60

JOHN LIESS,
Village Treasurer
I, Karl E. Krapp, clerk of the village of Mokena, Will County, Illinois, do hereby certify that the above is a condensed statement of the original itemized statement dated June 30th, 1923 filed in my office.
KARL E. KRAPP,
Village Clerk.

Palos Park

Miss Judith Storm who is here with her father and mother who is spending the summer weeks at the Sherwood Anderson cottage, is taking an active part in the Wulogum play The Donkey and the Mosquito.

Miss Ella Rourtelot returned Saturday July 14 from a trip to Texas. Mr. A. G. Lund is visiting at Star Lake, Wis. on a vacation.

The Rosenstone property on 88th Ave., w as sold recently.

Mr. Hane who was occupying the Rosenstone house will move to the Dunlap cottage.

Mr. and Mrs. Fred Dunlap will move to the Ward cottage this week. They expect to go in partnership with Mr. and Mrs. Ward in giving dinners to tourists. In the near future an addition will be built to the Ward home of two hundred seating capacity where dinners will be served to parties etc.

An extensive advertising campaign will be taken up later for the above. Mr. and Mrs. Chas. Vonderheight visited with Mr. and Mrs. John Sippel Sunday, also the Robert Folz family of Chicago.

Harry Folz returned from an enjoyable fishing trip to the Wisconsin Lakes a week ago. Harry reports good fishing. We wonder what he means.

Mr. Harry Barenz has new Baby Overland car.

Mr. Peter Lucas recently sold a strip of his property along Kenne Ave., and a green house has been started. The green house, it is reported, is being constructed in connection with the Oakwood Cemetery.

Margaret Macaulay is away on a vacation.

The Misses Cora and Emma Hyink have opened a sale of home bakery goods.

Carl Thorsell returned Saturday from a week's stay with the Robertsons at the Sand Dunes' Indiana.

Mr. and Mrs. Wise formerly residents of Blue Island have moved in to the Duyslissie house.

Jenny Hanchett accompanied the Hermanson family of Chicago on a trip to Lake Geneva over Saturday and Sunday. All the pleasures of Lake Geneva were greatly enjoyed.
